

Tags for Jakub Parkosz, *Traktat o ortografii Polskiej*

The first eleven tags are for characters unique to the *Traktat*. The others are for convenient access to other characters that appear in the text. Note that other tags than these may be used to mark characters for various purposes: these will have no effect on the preceding character. They will be hidden by ss10 but will be retained in the text and can be searched if entities are used. For example, $\text{a} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{u} \\ \text{TAG} \end{smallmatrix} \right]$ with ss10 applied will yield a .

Base + tag sequence	Mnemonic	Result (with ss10)
$\text{P} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{s} \\ \text{TAG} \end{smallmatrix} \right]$	square	P
$\text{B} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{l} \\ \text{TAG} \end{smallmatrix} \right]$	loop	B
$\text{P} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{r} \\ \text{TAG} \end{smallmatrix} \right]$	round	P
$\text{b} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{s} \\ \text{TAG} \end{smallmatrix} \right]$	square	b
$\text{c} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{h} \\ \text{TAG} \end{smallmatrix} \right]$	hook	c
$\text{g} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{h} \\ \text{TAG} \end{smallmatrix} \right]$	hook	g
$\text{l} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{l} \\ \text{TAG} \end{smallmatrix} \right]$	loop	l
$\text{p} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{s} \\ \text{TAG} \end{smallmatrix} \right]$	square	p
$\text{v} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{h} \\ \text{TAG} \end{smallmatrix} \right]$	hook	v
$\text{b} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{l} \\ \text{TAG} \end{smallmatrix} \right]$	loop	b
$\text{p} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{r} \\ \text{TAG} \end{smallmatrix} \right]$	round	p
$\text{m} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{d} \\ \text{TAG} \end{smallmatrix} \right]$	descender	m
$\text{n} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{d} \\ \text{TAG} \end{smallmatrix} \right]$	descender	n
$\text{f} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{d} \\ \text{TAG} \end{smallmatrix} \right]$	dot	f
$\text{g} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{d} \\ \text{TAG} \end{smallmatrix} \right]$	dot	g
$\text{l} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{b} \\ \text{TAG} \end{smallmatrix} \right]$	below	l
$\text{m} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{b} \\ \text{TAG} \end{smallmatrix} \right]$	below	m
$\text{n} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{b} \\ \text{TAG} \end{smallmatrix} \right]$	below	n
$\text{o} \left[\begin{smallmatrix} \text{P} \\ \text{TAG} \end{smallmatrix} \right] \left[\begin{smallmatrix} \text{s} \\ \text{TAG} \end{smallmatrix} \right]$	slashed	o
